DPM requires a database. You can use a local or remote instance of SQL Server that already exists.

Use stand-alone SQL Server
 SQL Server is not clustered.

Use clustered SQL Server
 SQL Server is clustered

Instance of SQL Server
 (Example: SQLSERV or SQLSERV\MYSQLINSTANCE):

User Name: Password:

Domain:

Select the appropriate option and click on the button to perform the prerequisite check and install the missing Windows components.

Details

i Setup will use the current user's credentials for this SQL instance.

How To Install System Center Data Protection Manager 2012 R2 Step by Step

The screenshot displays a Windows 7 desktop environment with the following icons: Administrator, This PC, Network, Recycle Bin, Control Panel, and Hyper-V Manager. An application window titled "DPM01 on HOST01" is open, showing the "Prerequisites Check" wizard for Data Protection Manager. The window includes a menu bar (File, Action, Media, Clipboard, View, Help) and a toolbar with various icons. The wizard interface features a "Prerequisites Check" header, a progress indicator, and a list of "Installation Stages":

- Welcome
- Prerequisites check (Current step)
- Product registration
- Installation settings
- Microsoft Update Opt-In
- Customer feedback option
- Summary of settings
- Installation

On the right side of the wizard, there are configuration options for the database:

- Use stand-alone SQL Server (SQL Server is not clustered)
- Use clustered SQL Server (SQL Server is clustered)

The "Instance of SQL Server" field is populated with "DMP01.LABTEST.LOCAL". Below this, there are input fields for "User Name:" and "Domain:". A note at the bottom of the wizard states: "Select the appropriate option, check and install the missing components." and "Installing basic components..."

Microsoft Update offers security and important updates for Windows and other Microsoft products, including Data Protection Manager. Updates are delivered using your Automatic Updates setting, or you can visit the Microsoft Update Web site. If you select to use Microsoft Update, a new shortcut to the service will be placed on the Start menu, and the Windows Update icon will redirect to Microsoft Update.

Use Microsoft Update when I check for updates (recommended)

I do not want to use Microsoft Update

Customer Experience Improvement Program

Your participation will help us to improve DPM.

Installation Stages

- Welcome
- Prerequisites check
- Product registration
- Installation settings
- Microsoft Update Opt-In
- Customer feedback option
- Summary of settings
- Installation

Select your Customer Experience Improvement Program enrollment choice.

Customer Experience Improvement Program

After you enroll in the program, DPM will gather anonymous information about your hardware and software configurations, and usage patterns of various DPM features and send it to Microsoft.

Think of it as your chance to help design the next version of DPM. We use the information to improve the quality, reliability, and performance of Microsoft software and services.

Learn more about the [Customer Experience Improvement Program](#).

Yes, I want to participate anonymously in this program. (Recommended)

No, remind me later.

You can change your Customer Experience Improvement Program enrollment choice at any time in DPM Administrator Console on the Options control.
