

NETWORK POLICY SERVER (NPS)

SERVER 2012RW

Network Policy Server (NPS) allows you to create and enforce organization-wide network access policies to centrally configure and manage :

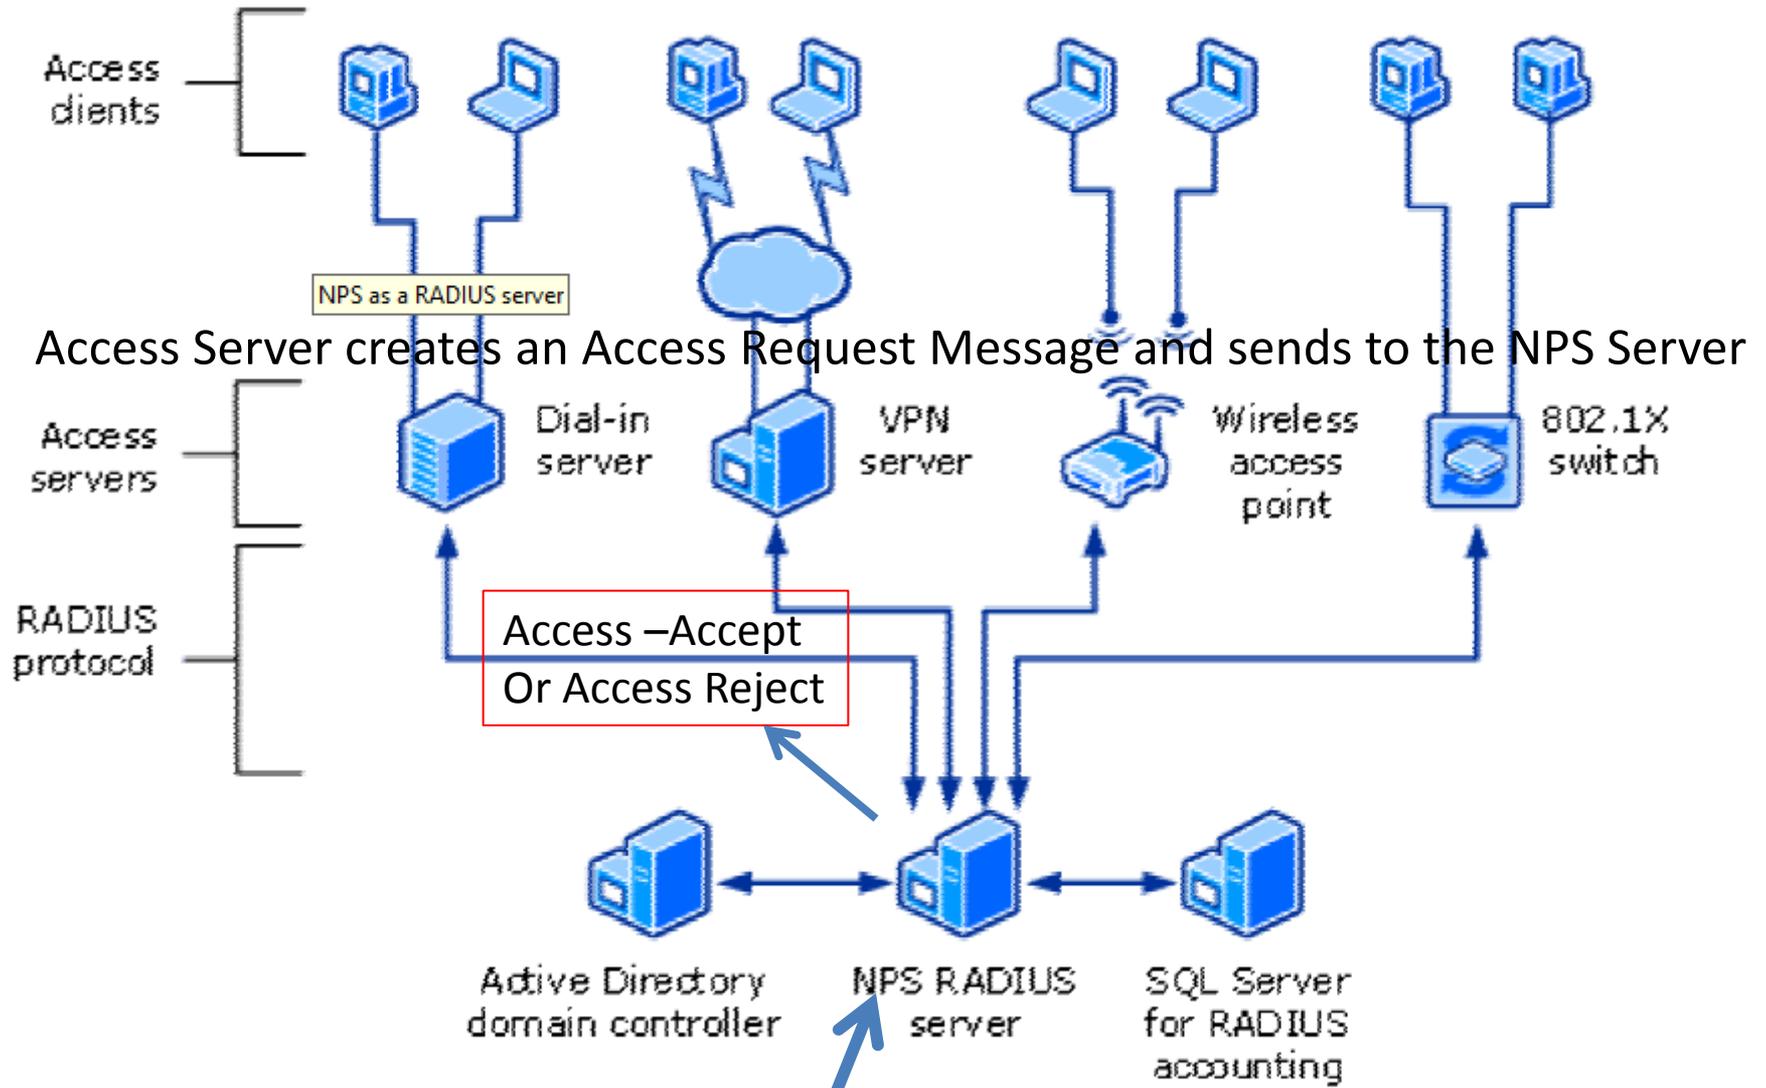

- network access authentication
- authorization
- client health policies

In addition, you can use NPS as a Remote Authentication Dial-In User Service (RADIUS) proxy to forward connection requests to a server running NPS or other RADIUS servers that you configure in remote RADIUS server groups.

NETWORK POLICY SERVER
can be configured as :

- RADIUS SERVER
- RADIUS PROXY SERVER
- NAP POLICY SERVER

Access client sends a connection request to the Access Server(Radius Client)

The NPS server evaluates the Access-Request message
