CONSOLE UNDER OPTIONS

Update Source and Proxy Server

Update Source

Proxy Server

You can choose the upstream server from which your server synchronizes updates.

- Synchronize from Microsoft Update
- Synchronize from another Windows Server Update Services server

Server name:

Port number:

- Use SSL when synchronizing update information

If using SSL, ensure that the upstream Windows Server Update Services server is configured to support SSL.

- This server is a replica of the upstream server

A replica server mirrors update approvals, settings, computers, and groups from its parent. Updates can be approved only on the upstream server.

Connect to Upstream Server

Download update information from Microsoft Update

- Before You Begin
- Microsoft Update Improvement Program
- Choose Upstream Server
- Specify Proxy Server
- Choose Languages
- Choose Products
- Choose Classifications
- Configure Sync Schedule
- Finished
- What's Next

To configure Windows Server Update Services on the following screens, we need to apply your upstream server and proxy server settings and synchronize information about available updates.

Information to be downloaded includes:

- Types of updates available
- Products that can be updated
- Available languages

Click Start Connecting to save and download upstream server and proxy server information. This process might take several minutes or longer, depending on your connection speed.

Update Files and Languages

Update Files

Update Languages

If you are storing update files locally, you can filter the updates downloaded to your server by language. Choosing individual languages will affect which computers can be updated on this server and any downstream servers.

- Download updates in all languages, including new languages
- Download updates only in these languages:

<input type="checkbox"/> Arabic	<input type="checkbox"/> German	<input type="checkbox"/> Portug
<input type="checkbox"/> Bulgarian	<input type="checkbox"/> Greek	<input type="checkbox"/> Portug
<input type="checkbox"/> Chinese (Hong Kong S.A.R.)	<input type="checkbox"/> Hebrew	<input type="checkbox"/> Romar
<input type="checkbox"/> Chinese (Simplified)	<input type="checkbox"/> Hindi	<input type="checkbox"/> Russian
<input type="checkbox"/> Chinese (Traditional)	<input type="checkbox"/> Hungarian	<input type="checkbox"/> Serbiar
<input type="checkbox"/> Croatian	<input type="checkbox"/> Italian	<input type="checkbox"/> Slovak
<input type="checkbox"/> Czech	<input type="checkbox"/> Japanese	<input type="checkbox"/> Sloven
<input type="checkbox"/> Danish	<input type="checkbox"/> Japanese (NEC)	<input type="checkbox"/> Spanis
<input type="checkbox"/> Dutch	<input type="checkbox"/> Korean	<input type="checkbox"/> Swedis
<input type="checkbox"/> English	<input type="checkbox"/> Latvian	<input type="checkbox"/> Thai
<input type="checkbox"/> Estonian	<input type="checkbox"/> Lithuanian	<input type="checkbox"/> Turkist

Set Sync Schedule

Configure when this server synchronizes with Microsoft Update

- Before You Begin
- Microsoft Update Improvement Program
- Choose Upstream Server
- Specify Proxy Server
- Choose Languages
- Choose Products
- Choose Classifications
- Configure Sync Schedule**
- Finished
- What's Next

You can synchronize updates manually or set a schedule for daily automatic synchronization.

- Synchronize manually
- Synchronize automatically

First synchronization:

4:24:40 PM

Synchronizations per day:

1

Note that when scheduling a daily synchronization from Microsoft Update, the synchronization start time will have a random offset up to 30 minutes after the specified time.

Finished

Finished initial configuration of your server

- Before You Begin
- Microsoft Update Improvement Program
- Choose Upstream Server
- Specify Proxy Server
- Choose Languages
- Choose Products
- Choose Classifications
- Configure Sync Schedule
- Finished**
- What's Next

You have now finished configuring your WSUS server. You can go on to launch the WSUS Administration Console or start the initial synchronization.

- Launch the Windows Server Update Services Administration Console
Get started administering your organization by starting the Windows Server Update Services Administration Console.
- Begin initial synchronization
The initial synchronization with Microsoft Update or your upstream server can take some time. The length of the initial synchronization depends on the number of products, update classifications, and languages you have selected, as well as the speed of your Internet connection.
